C Programming Language Tutorial

WHAT DOES C PROGRAMMING LANGUAGE MEAN?

The C Programming language is a <u>structure-oriented</u> programming language, developed at Bell Laboratories in 1972 by Dennis Ritchie.

Note: A <u>Structured-oriented</u> Programming language is a subset of the procedural language. Structure means to break a program into parts or blocks so that it may be easy to understand.

In the C Language, we break the program into parts using functions. It makes the program easier to understand and modify.
